EDUCATION

Columbia University (New York, NY) *Aug 2026 - Dec 2027*
M.S. in Business Analytics

Carnegie Mellon University (Pittsburgh, PA) *Aug 2019 - May 2024*
B.S. in Statistics and Machine Learning, Additional Major in Human-Computer Interaction

- Relevant Coursework: Modern Regression, Adv. Methods of Data Analysis, Algorithms of Adv. Data Structures, Fundamentals of Programming, Imperative Computation, Machine Learning, Programmable Usable Interfaces

RELEVANT SKILLS

- Product: Product Analytics, A/B Testing & Experimentation, User Research, Cross-functional Collaboration
- ML / Data Analysis: Validation, Regression, Clustering, Supervised/Unsupervised Learning, Exploratory Data Analysis
- Software: Python, R, Excel, C, JavaScript, HTML, CSS, SQL, Mixpanel, Tableau, Spyder, GitHub

EXPERIENCE

PNC Financial Services (Pittsburgh, PA) *Aug 2024 - Jul 2026*
Quantitative Analytics & Model Development Associate

- Validated 70+ statistical and machine-learning models across financial forecasting, operations, and risk, assessing methodology, data quality, assumptions, implementation, and performance prior to deployment or continued use.
- Performed back-testing, sensitivity analysis, benchmarking, and classification/regression performance analysis to assess model robustness and identify material limitations.
- Identified methodological and implementation issues that drove model remediation and redevelopment, independently evaluating revised approaches and enhancements prior to approval.
- Partnered with model developers, business owners, subject-matter experts, and senior managers to investigate findings, resolve technical issues, and translate quantitative results into actionable model-use and launch decisions.
- Designed an internal tracking system to centralize model-access issues and streamline model replication, testing, and validation workflows.

Aura Health (San Francisco, CA) *Jun 2023 - Aug 2023*
User Research & Data Science Intern

- Enhanced premium user conversion by 1.5% and reduced churn by 2.2% by developing 4 recommendation models with score-based algorithms using Python and SQL.
- Served as a direct bridge between the Data Science and User Research team to translate behavioral data and user feedback into product insights and short- and long-term priorities for Aura AI.
- Conducted 20 1:1 walkthrough interviews with Aura AI users, observing product usage and gathering qualitative feedback to identify usability pain points and inform feature improvements.

Data Analyst Intern *Jun 2022 - Aug 2022*

- Processed and analyzed data from Mixpanel, Google Sheets, and feedback systems across 32 categories, focusing on significance and sample size for key metrics.
- Conducted QA testing for 50 new podcast and coaching programs, ensuring accurate tagging and user recommendations.
- Created scripts and documentation for 12 models, improving code efficiency and easing onboarding for interns and staff.

PROJECTS

AI Mental Health Counselor Training Chatbot *Spring 2024*

- Led a team of 5 to spearhead end-to-end design and development of an AI chatbot system to train new online mental-health counselors for 7Cups.
- Built a Python/OpenAI prompt-generation engine that dynamically generated training scenarios based on configurable behavioral and therapy-related criteria.
- Delivered a user-friendly interface allowing users to customize chatbot behaviors, mental-health scenarios, and training conditions.
- Presented a 40-page final report and a demonstration video to the 7 Cups board to support both research and potential platform applications.
